A220 Project
1st iteration/Sprint

Submit your First Iteration Documentation:

1. A Cover Page: Project Title, Name, course title, instructor Name

2. Table of Contents (chapter titles, page numbers)

3. Document Revision History Table (If no revision, then leave it blank)
*This is the list of revisions/edits you have done on the document. (and not on the software)

4. Project Plan (1-2 page). E.g. Summary of what is to be done, etc. (write about all the things you have planned so for, brainstorm ideas, etc.)
**This could be the revised-one-page-summary

5. User Story (5 user stories, also you need to do programming)

6. User-Stories (5 non-functional requirements only in document, code generation is not mandatory)

7. Use-case (textual) - descriptions for each requirement

8. Use-case diagram

9. Sprint Backlog Screen shots of your Trello Kanban-Board or if you have not used Trello take a photo of your papers and add them to your WORD file.

10. Explain how did your team work on staging or grooming: identifying requirements and prioritizing them for the First iteration. (Write 2 paragraphs)

11. Write about your development process (Programming languages, database, etc.)

12. User manual – Screen shots of your working product with explanation on How to use your system (Step by step screenshot for each user story)

13. References (if you have used any resources including webpages, articles, etc. if not leave it blank)

*Submit your document on Canvas through the link.
**One submission per group.
*** You will learn the items that are highlighted, and they will be covered in class.
